Press Release

The Queen of cooking games is finally available on the move!

Chimera Entertainment's "Sara's Cooking Class" is ready for mobile devices

The world's largest brand of cooking games, "Sara's Cooking Class," is available on the AppStore for iPhone and iPad, also on Google Play and Amazon for Android systems. The mobile app was developed by the Munich studio Chimera Entertainment in close collaboration with Spil Games.

Munich, 13.11.2012 – Chimera Entertainment from Munich marks its first cooking game especially for girls with "Sara's Cooking Class" published. Together with Spil Games, the enormously popular browser-game series has been implemented for mobile devices by Chimera Entertainment.

"Sara's Cooking Class" is a fun gourmet paradise for girls! Twelve delicious recipes from around the world can be made with Sara's step-by-step instructions. More than 180 different ingredients and utensils will be used, giving each dish and its final decorations a special, creative touch. Girls and parents alike can discover how much fun cooking is! The app is meant to inspire young girls to learn more about recipes and cooking in real life, instead of indulging only on ready meals. "Sara's Cooking Class" is an entertaining and educational gaming experience - even for parents!

Christian Kluckner, Managing Director at Chimera Entertainment, said: "Working on "Sara's Cooking Class" with Spil Games has been so much fun! As friendly and bright as the game is, so was the atmosphere of the team during development. And we will not stop: there will be new recipes ready for an early Christmas, with a more seasonal flavor!"

Download a free version for [iOS](#) and [android](#) systems!

About Spil Games

Spil Games’ mission is to unite the world in play through a localized global network of online social-gaming platforms tailored to girls, teens and families. These platforms, which include GirlsGoGames (for tween girls) are localized in 15 languages, and entertain more than 180 million monthly active users from around the world each month. These platforms host popular casual and social games, which encourage players to connect and challenge themselves and each other while sharing their creativity. Additionally, Spil Games is present on mobile devices through browser-based and native application versions of the company’s targeted social-gaming platforms.
