– PRESS RELEASE FOR IMMEDIATE DISTRIBUTION –

## remote control productions expands to Romania

**Munich / Bucharest, April 20<sup>th</sup>, 2017** – **remote control productions** (rcp) announced today that it opened its second international subsidiary in Bucharest, Romania. **rcp romania** is headed up by Bogdan Oprescu, a Romanian games industry veteran with more than a decade of experience. Up until now, Bogdan has been CEO and co-founder of his own studio BigBlue Studios, one of the 10 biggest independent game developers in Romania. Prior to that, he held various production positions at Ubisoft and CI Games.

**remote control productions romania** is the second international subsidiary of rcp, Europe's biggest developer family. Today, the group consists of 13 game developer studios in Germany, Austria and Finland, a gamification unit and an in-house publisher as well as offices in Germany, Finland and now Romania. The first Romanian game developer to join the group will be announced shortly.

Romania's history of game development began in the early Nineties when Ubisoft opened its first international subsidiary in 1992. The first independent developer, FunLabs, began operations in 1999. Today, Romania has about 50 independent game development studios and employs about 7,000 people, most of them located in the capital of Bucharest as well as in several other cities.

"The further internationalization of our family of developers is an important goal for our group, and Romania is a perfect fit for us," comments Hendrik Lesser, founder and CEO of rcp. "The developer scene has grown from humble beginnings with a focus on QA services for major publishers like Ubisoft 25 years ago to dozens of studios that offer all kinds of games and services today. I'm particularly happy that Bogdan will run our Romanian subsidiary. He really "gets" rcp and what we stand for, has lots of experience in many different aspects of the games industry and an excellent local and international network. I can't think of a better fit!"

"I was instantly hooked when I heard about the rcp vision of a European family of developers", says Bogdan Oprescu, Managing Director rcp romania. "Here in Romania there's an active and growing independent developer scene which will benefit tremendously from the unique services the rcp group has to offer. I'm excited and proud to introduce rcp's proven business model to the Romanian games industry."

**About remote control productions GmbH**

remote control productions (rcp) is an independent production house focusing on development, production and mediation of games and gaming applications and is representing Europe's biggest developer family. Since 2005 the Munich-based company is supporting, financing and coaching startups and development studios creating games for all major platforms including PC, console, mobile and browser. In addition, rcp is participating in projects in the areas of VR/AR, serious games, gamification, conferences, education/training and lobbying. rcp has partnered up with and become co-owners of multiple development studios. The ever-expanding family currently consists of 13 studios, a gamification unit and an in-house publisher with a wide range of expertise in games and entertainment products for all platforms. Thanks to a large network of national and international partners built over the years, rcp has established itself as a credible, efficient and reliable production partner on 75 projects for all major platforms. Our publishing, licensing and work for hire partners include Rovio Entertainment, Paradox Interactive, Deep Silver/Fishlabs, Ubisoft, Astragon, ProSiebenSat.1 Games, Ravensburger Digital, Gamevil, Chillingo, Volkswagen, spilgames, DeNA, Bigpoint, Intel, Audi and many more.
